Workshop Summary Notes

- This workshop is intended as a 90 minutes activity ??
- The workshop is intended for students age ?? . (marked as advanced)
- The content is intended to be learnt through following a presentation and completing exercises.
- The learning platforms are VirtualBox, Ansible and Vagrant.
- No additional software is required.
- The workshop is intended for students at advanced level, with at least basic understanding of Python.
- This document includes some notes about what you need to do to prepare for us to come and run the workshop.

1 Guide

The following notes are guidelines for the things we have thought of or know from experience need to be prepared before we arrive to run the workshop. Please use these notes as an addition to any guidelines and preparation you would normally follow.

Provision of equipment We will provide laptops because of the required software in order to run the session. We will need to allow at least an additional 15 minutes for handing them out and logging everybody on / getting set up.

Software Installation Software will be installed on the laptops provided.

Website Access Please ensure your IT administrator has unblocked our Github site: <https://github.com/MVSE-Outreach/> The easiest way to test this is to get a student (not a teacher) to open the websites and attempt to browse them.

Students with special needs We are happy to accommodate students who have special educational needs or disabilities. If you can, please make us aware of any students in the group who might need extra attention and any additional information that will help us make the workshop as enjoyable and successful as possible for them.

DBS Checks Your school or organisation may require valid DBS checks (previously called CRB checks) for our volunteers. Please let us know if this is the case so we complete the process. All of our volunteers are current members of the University of Bristol.

Name List and Contact Information We would very much like to be able to keep in touch with students to encourage them to attend our other free, open outreach events (such as Digimakers). If possible, please supply us with a list of the names of students and their parent's contact information so that we may follow up with them after the last workshop. We never send spam and we'll only contact parents to let them know about our other outreach events that are available to them.
